

MUHER

Muher I is the pseudonym used by the Spanish couple of artist from Madrid, Manuel Herrera and Francisca Muñoz.

These two versatile artists work in fields as varied as architecture, photography, sculpture and advertising. The recurring theme of nature in their art-work comes from their frequent travels around the world. Their works are vigorous, energetic, and full of light and color. The seeking of the personal style has arrived them to manage the light and kinetic movements of the space, visually stunning, MUHER's vivid palm trees and sumptuous flowers invite us to enter in their personal world.

Muñoz and Herrera live and work between Europe, China and Florida. They have worked together as a group since the beginnings of the 80 and have shown their works all around the world, Latin America, Europe, the United States, Africa and Asia, thru important international museums. They have also contributed with art in public spaces in their home country, and currently in Miami.
